

PROFESSIONAL SUMMARY

Experienced full-stack developer with 10 years of experience building scalable SaaS platforms, backend systems, and modern web applications across multiple industries. Skilled in Laravel, cloud infrastructure, API integrations, and scalable software architecture. Proven track record leading backend development, establishing engineering standards, and delivering maintainable production-ready systems in remote environments.

WORK EXPERIENCE

- Senior Full Stack Web Developer

Jul 2019 – Present

Appetiser Apps | Melbourne, Australia (Remote)

 - Served as Project Lead / Backend Lead across multiple production platforms in marketplace, SaaS, and fitness industries, overseeing backend architecture, technical planning, development execution, and scalable system design for applications used by thousands of users.
 - Initiated and developed “Baseplate,” an internal starter platform adopted across projects to standardize engineering practices and accelerate development workflows.
 - Implemented reusable core modules including authentication, payments, subscriptions, role/permission management, and admin CMS functionality.
 - Contributed to project estimation, technical decision-making, debugging, optimization, and long-term platform maintenance.
 - Worked extensively with third-party integrations, cloud services, APIs, and modern backend frameworks to support scalable applications.
- Full Stack Web Developer

Sep 2017 – Jul 2019

Peoplewave Pte. Ltd | Singapore (Remote)

 - Worked on HR management platforms focused on employee onboarding and performance review systems, contributing to both frontend and backend development, feature implementation, and system maintenance.
- Full Stack Web Developer

May 2016 – Sep 2017

POSBang Corporation | Davao City, Philippines

 - Contributed to the development and maintenance of ERP systems for a clothing manufacturing company in Korea, supporting business operations, workflow management, and internal processes.
